## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I, claims 1-9 and 32 in the reply filed on July 27, 2009 is acknowledged.

## **PRIOR ARTS REJECTIONS**

### **Statutory Basis**

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

### **The Rejections**

Claims 1-3, 8-9 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Spartiotis (U.S. 6,188,089).

Spartiotis discloses, as shown is Figure 3, a semiconductor imaging device with

selectively removing parts of said plurality of contiguous layers so as to form said  
conductive contacts (13, 40), the conductive contacts defining one or more radiation  
detector cells in the semiconductor substrate (10) (see column 5, lines 51-65. Figure 3);

(2) including applying a third layer between said first and second layers, said third layer being a conductive layer (see Figure 3);

(3) including applying a further layer to the second layer, said further layer being a conductive layer (see Figure 3);

(8) wherein each of said first and second layers is applied by sputtering, evaporation, electrolytic deposition, or electroless deposition (see column 5, lines 48-50);

(9) including forming a layer of conductive material (12) on a surface of said substrate (10) opposite to said first surface (see Figure 3);

(32) comprising: manufacturing a radiation detector in accordance with any one of claim 1 to claim 9; individually connecting individual detector cell contacts for respective detector cells to corresponding circuits on a readout chip (see column 4, lines 26-38).

#### ***Allowable Subject Matter***

Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: The examiner has reviewed the prior art in light of applicant's claimed invention and finds that the combined claims define over the prior art. The cited prior art does not disclose or suggest a semiconductor device inter alia the limitations "...forming a layer of

passivation material on said conductive contacts and the regions around conductive contacts; and removing portions of said passivation material overlying said conductive contacts to expose the conductive contacts..”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
